# "Regenesis"

## Full Moon and Spring Equinox Gathering and Retreat

March 18th - 20th, 2022

Joyful Journey Hot Springs, Moffat, Colorado

At the base of the Sangre de Cristo Mountains and a few miles from Crestone Colorado

Humanity is at a crossroads. We must take action now for self preservation or risk self destruction. We must work to be more spiritually awake and conscious stewards of the earth. We must learn to collaborate and innovate and co-create solutions for a healthy future. Indigenous cultures from around the world all have prophecies about this time of great changes on earth.

On March 18th to the 20th during the full moon spring equinox we will gather to regenerate, activate and synergize to build a bridge from the crumbling old paradigm to the new earth reality. We will explore a wide range of prophecies, visions, solutions and existing projects that are emerging as part of the global transformation.

This weekend will include sacred music, dance, yoga, spiritual practices, educational workshops and ceremonies. There will be several in depth workshops on traditional spiritual wisdom and practices. We are also creating space for spontaneous experiences and opportunities to cultivate collaborative round tables and discussions. Overnight attendees will also have lodging and meals along with exclusive time to soak in the legendary healing lithium waters of the world's highest alpine desert oasis.

Reserve your place now due to limited capacity and the high amount of interest by other individuals that are architecting out the new dawn. "Now is the time and we are the ones we have been waiting for"

Capacity Limited to 45 full weekend tickets.
